

Designer Assignment – UI Critique & Redesign Platform: Projects.ink (by Cyrus365)

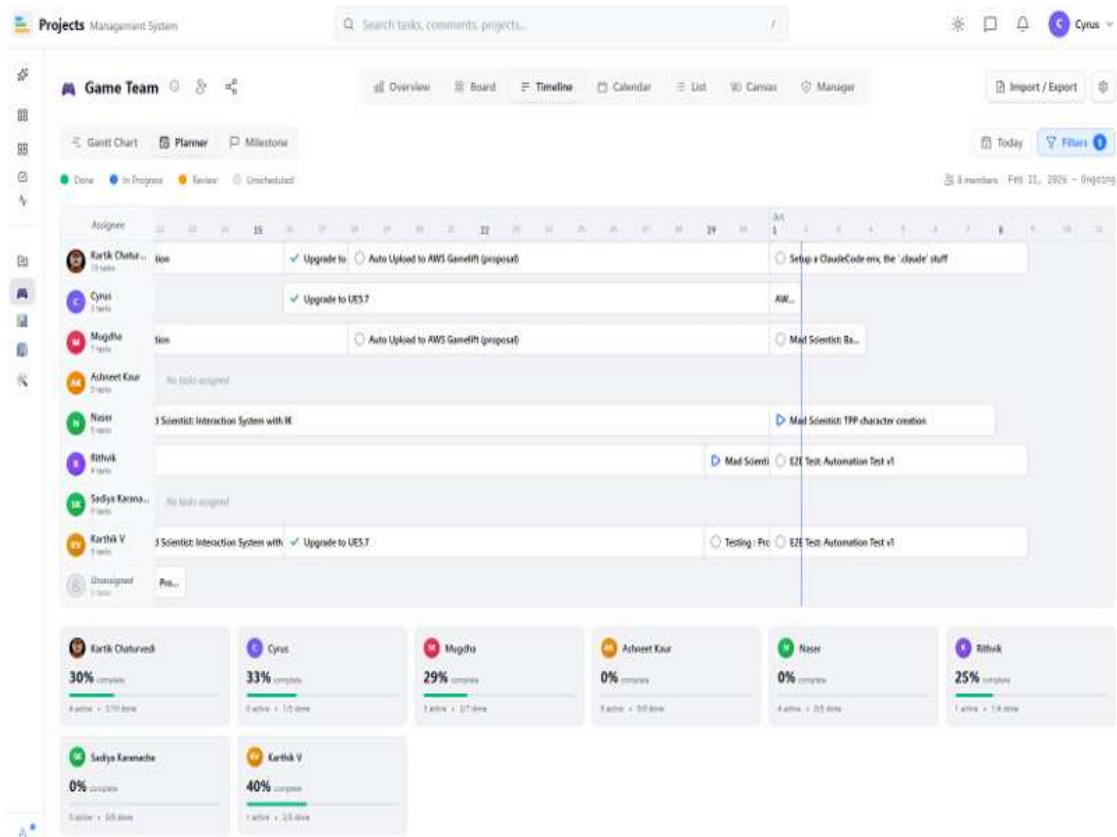

Candidate: Ramesh

Section 1 – Before (Original Website UI)

Screenshot Reference: Projects.ink original dashboard (Kanban + Timeline view).

Observations:

- **Strengths:**
 - Real-time sync and clear Kanban flow.
 - Multiple view modes (Board, Timeline, Calendar).
 - Task grouping by project and assignee.
- **Weaknesses:**
 - High information density; cluttered sidebar.
 - Weak visual hierarchy; too many icons.
 - Date/time scheduling unclear; poor focus feedback.

Section 2 – After (Redesigned Glassmorphic UI)

Screenshot Reference: Your redesigned glassmorphic dashboard (merged + timeline highlight).

Improvements:

- Frosted glass panels improve readability and visual depth.
- Simplified sidebar and top navigation for better hierarchy.
- Clear task segregation with glowing date/time selection.
- Interactive feedback (hover glow, active highlights).
- Consistent color palette (blue-white gradient) for calm focus.

Section 3 – Notes & Differences

Aspect	Before	After
Visual Hierarchy	Overcrowded, icons overload	Clean, layered glass panels
Information Density	High, difficult to scan	Balanced spacing, clear grouping
Usability	Static, limited feedback	Interactive glow and hover states
Scheduling	Dates unclear	Highlighted date/time capsules
Aesthetics	Flat, utilitarian	Modern glassmorphic aesthetic

Section 4 – Use Cases

- **Project Managers:** Quick progress tracking with visual clarity.
- **Agile Teams:** Easy sprint planning and task assignment.
- **Game Developers:** Timeline visualization for milestone tracking.
- **Design Review:** Demonstrates hierarchy, focus, and modern UI trends.

Section 5 – Justification

The redesigned glassmorphic dashboard enhances clarity, reduces clutter, and introduces interactive scheduling. It supports project managers in tracking progress efficiently while maintaining a modern, visually appealing interface.
